www.elegant-illusion.com

In October 2002, Elegant Illusions, Inc. filed a Form 15 with the Securities and Exchange Commission terminating registration of its Common Stock under the Securities Exchange Act of 1934. As a result, it is no longer obligated to file periodic reports with the Securities and Exchange Commission. **This report is not a quarterly report on Form 10-QSB.**

FINANCIAL INFORMATION

Financial Statements

The accompanying financial statements are unaudited for the interim periods, but include all adjustments (consisting only of normal recurring accruals) which our management considers necessary for the fair presentation of results for the three months ended March 31, 2006.

Moreover, these financial statements do not purport to contain complete disclosure in conformity with generally accepted accounting principles and should be read in conjunction with our audited financial statements at, and for the fiscal year ended December 31, 2005. If you would like a copy of such audited financial statements, please contact us and we will send them to you free of charge.

The results reflected for the three months ended March 31, 2006 are not necessarily indicative of the results for the entire fiscal year.

ELEGANT ILLUSIONS, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(Unaudited)

1. COMMENTS

The accompanying unaudited consolidated condensed financial statements, which are for interim periods, do not include all disclosure provided in the annual consolidated financial statements. These unaudited consolidated condensed financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto contained in the Annual Report for the year ended December 31, 2005 of Elegant Illusions, Inc (the "Company") The December 31, 2005 consolidated condensed balance sheet was derived from audited consolidated financial statements, but does not include all disclosures required by generally accepted accounting principles.

In the opinion of the Company, the accompanying unaudited consolidated financial statements contain all adjustments (which are of a normal recurring nature) necessary for a fair presentation of the financial statements. The results of operations for the three months ended March 31, 2006 are not necessarily indicative of the results to be expected for the full fiscal year.

2. EFFECTS OF HURRICANE KATRINA

Our operations and financial condition were significantly and adversely affected by Hurricane Katrina. All three New Orleans locations were closed effective August 29, 2005. The two Bourbon Street locations re-opened December 2, 2005; however the Riverwalk location remains closed and management does not anticipate re-opening this location until such time as the Riverwalk Marketplace Mall has approximately eighty percent of its locations open for business. Management does not know when or if this will occur.

Management has determined that, as of March 31 2006, the Bourbon Street and Riverwalk jewelry stores sustained business income losses of approximately \$168,646 and \$136,736, respectively. The Bourbon Street Gallery sustained business income losses of approximately \$14,191.

Additionally Management has determined the Riverwalk location sustained inventory, equipment and extra expense losses of approximately \$199,379. Of these losses totaling approximately \$518,952 the Company's Insurance Carrier has re-imbursed the Company an amount of \$459,957 as of March 31, 2006 and an additional amount of \$58,995 as of April 7, 2006.

Management has also estimated certain costs for restoring the Riverwalk location of approximately \$23,935. Management cannot be certain if actual restoration costs will exceed this amount.

Management's Discussion And Analysis Of Financial Condition And Results Of Operations

Cautionary Statement on Forward-Looking Statements

Except for the historical information contained herein, certain of the matters discussed in this report are "forward-looking statements," which involve certain risks and uncertainties, which could cause actual results to differ materially from those discussed herein. Forward-looking information generally is information stated to be anticipated, expected or projected by us. The following list, which is not intended to be an all encompassing list of risks and uncertainties affecting us and our business, summarizes several factors that could cause our actual results to differ from those anticipated or expected in these forward-looking statements: that low or negative growth in the economy or in the financial markets will reduce discretionary spending on goods such as those sold in our stores; that warehousing and distribution productivity and capacity can be further improved to support our distribution requirements; that changes in expenses (such as changes in our labor, rent and/or inventory purchase costs) could adversely affect our results of operations; that competition may impact our sales efforts by diminishing sales and/or requiring us to cut prices; that seasonality of the retail created gem jewelry business or downturns in consumer spending during the fourth quarter may adversely affect our operating results; that we may not be able to continue to manage our inventory and product supply effectively to respond to consumer demand; that fluctuations in created gem prices may negatively affect the business; that sustained adverse weather conditions may adversely affect our sales; that legal or governmental proceedings may have an adverse effect on our financial results or reputation; that alternate sources of merchandise supply may not be available on favorable terms to us; that key personnel who have been hired or retained by us may depart; or that changes in government or regulatory requirements may increase the cost of or adversely affect our operations.

We caution readers that any such forward-looking statements are based on our current expectations and beliefs but are not guarantees of future performance. Actual results could differ materially from those expressed or implied in the forward-looking statements.

Results of Operations

Three Months Ended March 31, 2006 Compared to Three Months Ended March 31, 2005

Sales for the three months ended March 31, 2006 decreased \$523,669 or approximately 27.2% when compared to the three months ended March 31, 2005.

Management believes that these significant decreases in Company wide sales were a direct result of Hurricane Katrina, its continued effect in the aftermath (see "Effects of Hurricane Katrina" below) and a reduction in sales at locations open more than a year (see "Revenues Same Store Locations" below). Historically, our New Orleans locations generate a significant amount of our revenues. As of March 31, 2005, we operated 23 retail locations and, as of March 31, 2006, we operated 21 retail locations excluding the Riverwalk location.

Costs of goods as a percentage of revenues increased from approximately 25.1% during first quarter of 2005 to approximately 28.6% during the first quarter of 2006. Management believes this increase in cost of good sold is the result of higher costs for gold and silver.

During the three months ended March 31, 2006, selling, general and administrative expenses decreased when compared to the three months ended March 31, 2005 by \$286,586 (approximately 20.0%). Management believes this decrease is a function of decreased sales. As a percentage of sales, selling, general and administrative expenses increased from approximately 74.4% during the three months ended March 31, 2005 to approximately 81.7% during the three months ended March 31, 2006. Management believes the increase in selling, general and administrative expenses as a percentage of sales is primarily the result of revenues not realized at our three New Orleans locations and a decrease in same store sales.

Revenues Same Store Locations.

As of March 31, 2006, we operated 19 locations that were also in operation at March 31, 2005: two in New Orleans, three in Monterey, one in Sacramento, one in San Diego, one in San Francisco, one in Palm Springs, one in Branson, one in Laughlin, two in St Croix, one in Birch Run, one in Miromar, one in Sarasota, one in Wailea, Hawaii, one in Maui, Hawaii and one in Vail.

Revenues from these locations for the quarter ended March 31, 2006, decreased approximately 25.3% from the same period in 2005. Management believes this decrease in same store revenues is the result Hurricane Katrina's impact on revenue at the two New Orleans locations that have re-opened together with a middle class faced with shrinking discretionary funds resulting from higher energy and housing costs. We are realizing fewer sales, both in low ticket items and high ticket items. We believe people are traveling less as a result of the high gasoline prices and this impacts our revenues at our locations in tourist destinations.

Net Loss

During the three months ended March 31, 2006, we realized a net loss of \$127,550 compared to net loss of \$40,792 for the three months ended March 31, 2005.

Inventory Turnover Ratios

During the three months ended March 31, 2006, we maintained an inventory that provided a turnover ratio of 0.34 to 1. We believe that this inventory turnover ratio is appropriate for our plan of operation, including maintaining our strategy of replacing inventory sold at our retail locations within a 2-3 day time frame. We review items on hand, on a regular basis, to determine slow moving items, then discount the price of those items so they are sold at prices that still generate a positive gross margin. The inventory turnover ratio for the three months ended March 31, 2005 was 0.41 to 1.

Liquidity and Capital Resources

As of March 31, 2005, we had \$1,053,025 in cash and cash equivalents, down \$138,341 from December 31, 2005, and our current assets exceeded our current liabilities by \$6,084,508, down \$140,754 from December 31, 2005.

Although we opened two new stores in 2005, Balboa Island in Newport Beach, California and Franklin Mills in Philadelphia, and continue to look for potential new store locations, store expansion is not our primary focus. Our Primary focus is on operating controls and costs.

We plan on closing the Birch Run store because this location is not meeting our revenue expectations.

Effects of Hurricane Katrina

All three New Orleans locations were closed effective August 29, 2005. The two Bourbon Street locations re-opened December 2, 2005; however the Riverwalk location remains closed and management does not anticipate re-opening this location until such time as the Riverwalk Marketplace Mall has approximately eighty percent of its locations open for business. Management does not know when or if this will occur.

Management has determined that, as of March 31 2006, the Bourbon Street and Riverwalk jewelry stores sustained business income losses of approximately \$168,646 and \$136,736, respectively. The Bourbon Street Gallery sustained business income losses of approximately \$14,191.

Additionally Management has determined the Riverwalk location sustained inventory, equipment and extra expense losses of approximately \$199,379. Of these losses totaling approximately \$518,952 the Company's Insurance Carrier has re-imbursed the Company an amount of \$459,957 as of March 31, 2006 and an additional amount of \$58,995 as of April 7, 2006.

Management has also estimated certain costs for restoring the Riverwalk location of approximately \$23,935. Management cannot be certain if actual restoration costs will exceed this amount.

Our business in New Orleans is highly dependent on tourist foot traffic. It is our understanding that the Convention Center currently has conventions, however attendee numbers are substantially below pre-Katrina levels. Additionally, the Cruise Ship business has not returned and we have no knowledge when this will occur. The Bourbon Street locations are open with limited operating hours until such time as foot traffic returns to pre-Katrina levels, if at all. Management cautions it has no specific date for when the Riverwalk location will re-open.

Although we continue to look for potential new store locations, store expansion is not our primary focus. Our primary anticipated capital expenditure during the year ending December 31, 2006 will be the opening of possibly one to two additional created gem jewelry stores.

We believe that we have sufficient capital reserves for the foregoing activities.

Off-Balance Sheet Transactions

We do not have any transactions, agreements or other contractual arrangements that

constitute off-balance sheet arrangements.

Application Of Critical Accounting Policies

Financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. These estimates and assumptions are affected by management's application of accounting policies. Critical accounting policies for us relate to impairment of long-lived assets, and the costing of inventory as it relates to obsolescence and marketability.

Actual results could differ from those estimates. For example, unexpected events or changes in market conditions or a downturn in the economy could adversely affect actual results. Hurricane Katrina was a good example of a material unexpected event. Estimates are used in accounting for, among other things, inventory obsolescence, depreciation, taxes, and contingencies. Estimates and assumptions are reviewed periodically and the effects of revisions are reflected in the Consolidated Financial Statements in the period they are determined to be necessary.

Management believes the following critical accounting policies, among others, affect its more significant judgments and estimates used in the preparation of its Consolidated Financial Statements.

Merchandise Inventories. Merchandise Inventories are stated at the lower of cost or market. Management is constantly reviewing the turnover of individual items to determine if adjustments in pricing are required to affect the sales of said products. Substantially all inventories represent finished goods which are valued using the first-in, first-out (FIFO) inventory method.

We also write down our inventory for discontinued, slow-moving and damaged inventory if required. This write-down is equal to the difference between the cost of inventory and its estimated market value based upon assumptions of targeted inventory turn rates, future demand, management strategy, and market conditions. If actual market conditions are less favorable than those projected by management, or management strategy changes, additional inventory write-downs may be required and, in the case of a major change in strategy or downturn in market conditions, such write-downs could be significant.

Shrinkage is estimated for the period from the last inventory date to the end of the fiscal year on a store by store basis. Such estimates are based on experience and the shrinkage results from the last physical inventory. Physical inventories are taken annually for all store locations and for the distribution warehouse. The shrinkage rate from the most recent physical inventory, in combination with historical experience, is the basis for providing a shrinkage reserve if required.

Long-lived Assets. Long-lived assets are periodically reviewed for impairment by comparing the carrying value of the assets with their estimated fair values. If the evaluation

indicates that the carrying amount of the asset may not be recoverable, the potential impairment is measured based on a projected discounted cash flow method, using a discount rate that is considered to be commensurate with the risk inherent in our current business model. Assumptions are made with respect to cash flows expected to be generated by the related assets based upon updated projections. Any changes in key assumptions or market conditions could result in an unanticipated impairment charge. For instance, in the event of a major market downturn, individual stores may become unprofitable, which could result in a write-down of the carrying value of the assets located in those stores. Any impairment would be recognized in operating results if a permanent reduction were to occur.

Revenue Recognition. We recognize revenue in accordance with the Securities and Exchange Commissions Staff Accounting Bulletin No. 101 Revenue Recognition in Financial Statements (SAB 101). Revenue related to merchandise sales is recognized at the time of the sale, reduced by a provision for returns. The provision for sales returns is based on historical evidence of our return rate.

Income Taxes Income taxes are estimated for each jurisdiction in which we operate. This involves assessing the current tax exposure together with temporary differences resulting from differing treatment of items for tax and accounting purposes. Any resulting deferred tax assets are evaluated for recoverability based on estimated future taxable income.

Issues And Uncertainties

The risks and uncertainties discussed in “*Cautionary Statement on Forward-Looking Statements*” above, among others, should be considered in evaluating our financial outlook.

Other Information

None during the quarter ended March 31, 2006.
